HALF HOLIDAYS START WEDNESDAY, JUNE 5th, AT NOON AT IRMA

IRMA SPORTS DAY, JUNE 12th

The annual Sports Day for Irma and district has been set for June 12, and already preparations have been made to make it one of the best in the history of the community.

It is being held under the auspices of the Irma Agricultural Society at the fair grounds.

A purse of \$150.00 has been hung up for baseball, with \$100.00 first prize and \$50.00 second prize. Last year some of the best games of baseball in this part of the province were seen at the sports. It is expected that some fast teams will enter this tournament.

Other sports events is boys' bicycle races, men's half mile foot race, men's 100 yard dash, catch the greasy pig, free for all, catch the little prairie for boys twelve years and under. There will be the usual line of children's races, and novelty races.

The re-organized Viking band has been engaged to furnish music and under new management they are expected to be better than ever and have promised a lot of music.

Refreshment booths and lunch counter will be prepared to serve the crowds at the grounds.

The day will wind up with a dance and show in Kiefer's hall.

Everybody get ready for a big day.

OBITUARY

The people of Albert School District were much shocked on Tuesday the 28th of May to hear that Mr. Dan Ramsay, father of Mr. W. Ramsay, had died suddenly the evening before. He had had influenza in the East and his son Mr. W. Ramsay went to see him and as he rallied and wished to come West with his son, he arrived in Irma, March 6th. Medical skill and the loving care of son and family were of no avail and he died suddenly as he was feeling better, which is often the case with heart trouble. He was eighty years old on the 26th of May, the day before his death. He was born in St. Eleanor, P. E. Island and was the son of James Ramsay. His wife was Miss Christie McCallum who predeceased him three years ago. Five children survive him, one son Percy died three years ago. Surviving children are: William, Albert School District; Mrs. George Warren, Fortune Cove, P.E.I.; Mrs. Pepper, Ryley, Alberta; Gordon, Boston, Mass. and Calvin, Edmonton. One sister, Mrs. McGowan, St. Eleanor, P.E.I. is the only surviving member of a large family.

Mr. Ramsay made several trips west in years gone by and planned to end his days here. The funeral services were held in the Church at Irma today May 30th, under the direction of the Masons, and the body will be forwarded to his old home in Fortune Cove, P. E. Island, accompanied by Mrs. W. Ramsay.

We sympathize very deeply with our old friends in their hour of bereavement but feel sure they will find some comfort in knowing that now he is free from pain and that they have given him every loving care while with them.

The crowded church and the many floral tributes testified to the sympathy and respect in which he and his are held in his community.

He will be deeply regretted in his old home where both he and his wife were noted far and near for their kindness to those in trouble.

SEATS ON SALE FOR BIG BOXING CONTEST

(From Viking News)
Seats for the big boxing programme to be held at the fair grounds on Friday, June 7th, are now on sale at the Viking Drug Store. If you want reserved seats for this event which will bring together two of the best boxers in this part of Alberta, you want to get them right away. Much interest is being manifested in the main bout between Curly Kid Archibald of Irma and Dave Dorwood, of Innisfree, both of whom have fine records as boxers. Both boys will have a large number of supporters and it is expected that the seats will all be taken when the contest opens.

A special platform for the ring and large gas lights will give everybody a good view of the contest.

The affair is being staged under the auspices of the Viking Elks Lodge. Plan to be at the Viking on June 7th. It's going to be a big night.

OIL ACTIVITIES IN LOCAL FIELDS

Possibly the most enthusiastic meeting of those interested in the progress and advance of Wainwright, as a world-known oil centre, gathered last Friday in the Town Hall, and before adjourning all present had thoroughly decided that the field has now been so far accepted as the most great potential crude oil field of North America, that nothing shall be placed in the way of full advancement of every interest which will accrue to that end.

Led by Mr. J. L. Daugherty, of the Daugherty Petroleum Ltd., and field manager for the Onala Oil Ltd., quite a number of Toronto financiers who were present expressed themselves as willing to go the limit in co-operation; that the Wainwright field may truly be given the thorough proving which is desired. Others told of deep test wells being arranged for, and it was mentioned that not less will be drilled on this structure during the present season.

The activity being displayed by several oil companies during the past week confirms this, for only last week four new derricks were started and three others are being taken to sites.

Wainwright Star.

300-500 BARREL OIL STRIKE IN THE CHAUVIN DISTRICT

A great deal of interest has been created throughout the district and in Alberta Oil Circles generally by the striking oil in large quantities in the Kibstone Oils Limited well thirteen miles north of Wainwright.

Heavy crude oil, testing from 20 to 22 degrees Baume is standing at a height of 380 feet up the hole. This oil is free from water, has considerable gasoline content and seems to possess excellent lubricating properties. It will be thoroughly tested out within the next few weeks.

This well has been subject to bailing tests and has delivered about 70 barrels in an hour without appreciably lowering the level of the oil. Equipment is to be brought in at once and complete tests will be made. The strike was made just ten feet below where the large flow of gas was brought in last fall, the crude being brought in at 1827 feet, and it is estimated that this well will produce from 300 to 500 barrels of crude daily.

Chauvin Chronicle.

NEWS ITEMS FROM KINSELLA

Miss Larue, teacher in the public school here entertained her sister from Stettler during the holidays.

There were five cars went from here on Thursday taking the children to Wainwright to take part in the musical festival.

Mr. Third and Mrs. Ansell spent Friday afternoon the 24th at Killam. Their niece returned home with them and stayed until Sunday.

Mr. and Mrs. Ferries and Miss May Murray attended the sports at Loughheed on the 24th.

Mr. and Mrs. Nease and son spent the holiday and week end at Round Hill, Alta.

A terrific wind storm struck this place on Friday evening about 6.30 P.M. but no damage was done according to the papers. It seemed to be general all over.

On Monday we had a much needed rain. We now need warmer weather. Miss Bessie Hart of Viking called on Mr. and Mrs. R. Eaton Sunday evening.

Mrs. Scott, President of the W. I. and Mrs. William Anderson as a delegate are attending the W. I. convention in Edmonton this week.

Miss Bessie Scott teacher at the Albert school spent the holiday at her home north of town.

Mrs. Minnie Miller who spent the winter in the States with her mother, returned home about two weeks ago.

Mr. G. Fisher, of Jarow, was here on Saturday and put lightning rods on the school.

All those who had scarlet fever are getting along nicely. The nurse who cared for Mrs. F. Murray and daughter Alice returned to her home in Edmonton Friday evening.

WHERE CITY AND COUNTRY MEET

More than ordinary interest is being shown in the hand contest which will begin a feature of the Edmonton Exhibition this summer, and the directors are delighted at the success which has greeted the institution of this event. The contest has evidently come to stay as a part of the Exhibition program. Last year, the first time of holding, it was warmly welcomed, and the city folk were enthused by the hands and the manner in which they entered into the competition. This year, the 50th anniversary celebration of the founding of the exhibition, many more people will be attracted by the contest, and the hands are sure to increase the number of their own followers. The contest means a real illustration of the slogan "Where city and country meet." The contest takes place on the opening day, July 15th, when the Hon. Frank Oliver will open the exhibition, and a special program is being prepared for the day, in which a monster street parade is the commencing feature. All the competing hands are asked to play in this parade. Reduced prices for admission are being charged on this day, 25c at the gate and 25c at the grand stand. Cheap fares are available from all points in Alberta and Saskatchewan.

Entries for the contest include Linar Collieries, last year's winners, Camrose Citizens, Botha, Viking, Vulcan, High River Elks, Stettler Elks, Alliance Elks, Coronation Concert Band.

There is yet time for others, as the closing date for entries is not until June 25th. The contest is open to any hand from a town under 5,000 population. First prize is \$225 and 10c trophy; second prize \$150; third prize \$100 and fourth prize \$75. Every band of not less than 12 players that takes part and does not win a prize will be paid the sum of \$50. The test piece is the overture "Spirit of Youth", by Fortunate Salsola.

The Edmonton Exhibition Association has a message and an acknowledgment which it wishes to be conveyed to all the readers of country newspapers. The editors, says P. W. Abbott, Managing Director, speaking on behalf of the Association, have operated so splendidly in furthering its activities as an agricultural show, by their wide-spread publicity in the rural districts that it is considered that due recognition should be made at the forthcoming 50th anniversary celebration of the exhibition.

For this reason it has been decided to hold a country editors day, when all the editors of the country newspapers in northern and central Alberta will become the guests of the Association.

In addition to visiting the exhibition the program of entertainment includes a dinner to the editors, when they will have the opportunity of meeting the directors, some of the leading citizens and newspaper men of the city.

The event is it confidently anticipated, cannot result in other but a strengthening of the present happy relations between town and country.

ROAD SIGNS WANTED

Opening of the motor tourist season again emphasizes the necessity of Alberta's highways being adequately marked with signs. Little was done last year, and it is to be hoped that 1929 will see a complete system of marked main roads in this province.

The sign to be used by the Provincial Government on the main roads is of a uniform type, in that it has also been adopted by other western provinces. With the highway system largely extended last year and further additions for the current season, it is imperative that proper marking be made available for the guidance of tourists and others.

While the Government and the A. M. A. are extending their efforts to mark the roads, there is a responsibility on the local authorities or clubs in seeing that these signs are kept in proper shape. Citizens should be urged to protect the signs and take action against all persons attempting to mutilate them. Such vandalism should be severely dealt with, as, if not curbed, it would soon prove to be very detrimental to tourist traffic and its possibilities in Alberta—Good Roads.

E. L. Richardson, Calgary.
Edmonton—July 15, 16, 17, 18, 19, and 20th, Miss E. L. Holmes, Edmonton.

FINE TROPHY FOR CAMPAIGN AGAINST CROWS AND MAGPIES

Farmers, ranchers and other sportsmen, wishing to get pleasant eggs for hatching, and live pheasant chicks in connection with the stocking movement which is spreading rapidly throughout the province, have been able to secure supplies through the Calgary Fish and Game Association. The association operates without profit. It is actuated by the desire to help the stocking movement.

Those who are interested may secure information by communicating with the secretary of the Calgary Fish and Game Association, c/o The Calgary Herald.

The Alberta association and the local associations are also conducted a vigorous campaign against crows and magpies. The suggestion emanating from the Hanna Fish and Game Association that a trophy for competition between the thirty-five locals in the province be donated, resulted in a generous contribution by Mr. A. E. Cross, of Calgary, of a trophy for this purpose.

The regulations respecting the trophy will be announced later.

The Alberta Association is backing up the U.F.A. and Alberta government in the war against pests.

CHURCH NOTICES AND ACTIVITIES

CHURCH SERVICES
The Rev. M. L. Wright will be home from Conference and will preach at:
Ross—11 A. M.
Alma Mater—2 P. M.
Roseberry—3.30 P. M.
Irma—8 P. M.
Mrs. Thomas Shaw will report the findings of the Committee on Social Service and Evangelism of which she was the representative of the Wainwright Presbytery. Mrs. Wright will speak on "Some Thoughts from Conference."

CONFIRMATION SERVICE

The Irma United Church was the scene of a very solemn, impressive and spiritual service on Sunday evening, May 19th.

The pastor preached on "Reckoning on God" and during the service baptised into the Christian faith, James Pond, a well known and highly respected Chinese restaurant keeper.

Mr. Pond together with seven others, one of whom was seventy-five years of age, were confirmed and received into full communion.

After this the members of the session welcomed twelve others who presented their certificates from other churches. This was a fitting close of a pleasant pastorate, as we have just learned that Mr. Wright is moving his family into Edmonton where they can have university privileges and he is taking charge of the mining work in the mountain towns.

NOTICE

In order to express our appreciation of Miss E. McLellan in a tangible way, the Wainwright and Hardisty residents have created a fund, that Miss McLellan may secure something to assist her in her work. Any Irma friends who wish to contribute to this are asked to leave their contributions with Mr. S. Reeds, Treasurer of Irma W. M. S.

The regular meeting of the Irma W. M. S. was held on Tuesday, May 28th at the home of Mrs. C. T. Hill and Mrs. F. Hill. A large attendance was present, as the Wainwright Auxiliary was visiting the Irma Society, also a few from the Hardisty W.M.S., but the commodious home of Mrs. Hill nicely accommodated all those present. The principal attraction of the afternoon was Miss E. McLellan, a missionary on furlough from Korea. Miss McLellan, a cousin of Mrs. Hill, gave a splendid and most inspiring address on her work among the Koreans. She handled her subject beautifully, giving a clear, concise talk, in a most pleasing and modest manner. All praise and honor is due these missionaries who are giving their talents and their lives to this great work.

The society also greatly enjoyed a solo by Mrs. Roy Whyte, accompanied by Mrs. Edwards of Wainwright.

The meeting then closed to meet again on June 20th, at the home of Mrs. Fenton.

A dainty lunch was then served to which all present did ample justice.

R. J. TATE SUFFERS FROM STROKE

Wednesday evening about seven p.m. Mrs. R. J. Tate called Mr. Tate to come to supper but not receiving an answer she found Mr. Tate had suffered from a stroke and was unconscious. Some of the neighbors were called and Mr. Tate who had been sitting on the veranda, was removed to his room and Dr. Murray was called. Thursday morning Mr. Tate was resting easily but was very weak. His many friends in the Irma district wish him a speedy recovery.

WEDNESDAY HALF-HOLIDAYS COMMENCE JUNE 5th

During the months of June, July and August the general stores and business places in Irma will close at noon every Wednesday. Do your shopping early.

The Times has had enquiries from several of their subscribers about oil wells that have been reported to have started drilling near Irma this spring. To date no drills or crews have arrived at Irma although several derricks are being erected around Wainwright. Just as soon as we can get definite news of local drilling we will publish same.

The Power Of Small Things

The following item was recently printed in a large number of newspapers:

"Forty-five years ago there was a strike in an Ohio coal mine. A group of enraged miners took a car of coal, set it afire, and pushed it down into the mine. That fire is still burning under ground, spreading many miles, destroying valuable coal deposits and rendering hundreds of acres of surface ground sterile. Today it threatens to destroy a school building and some homes in a village. Burning beneath them it is undermining the ground and may cause them to collapse. The fire that a moment's anger started 45 years ago certainly turned out to be a bigger thing than the men who started it ever imagined."

There is a moral to this incident which might well be heeded, for, after all, it is but an illustration, a spectacular one, it is true, of almost every day happenings. The moral is that a small act may have far-reaching consequences, either for good or for evil.

A cow kicked over a lamp in a barn in Chicago, and the Great Chicago Fire resulted.

A frenzied student assassinated an Austrian Grand Duke and his wife, and the Great War was the immediate outcome with its sacrifice of ten millions of lives and hundreds of billions of dollars in property and other losses.

An employee is disgraced in anger, and perhaps unjustly, and a nationwide strike follows bringing suffering and ruin in its wake.

A careless workman, or a dishonest contractor, neglects to put a sufficient quantity of cement in the foundations of a building or in the piers for a bridge, or the retaining wall of a dam, and disaster follows taking heavy toll in human lives.

A rotten timber is used in building a ship, and the vessel sinks; a faulty rail is laid in a track, and a train is wrecked; a careless camper neglects to put his fire, and a terrible conflagration wipes out a forest.

And how often has a hasty word, an insulting remark, led to family and business estrangements with dire results to all concerned.

How often, too, has the peace and friendliness of an entire community been destroyed because of the whispered scandal, the unguarded reflection upon the honor and integrity of another, the premeditated utterance casting aspersions upon those of different races or religious beliefs.

All little things in comparison to their terrible effects and disastrous results!

Fortunately, for the human family, the reverse is also true. We still recall our childhood's interest in the story of the little Dutch boy who by sticking his finger in the small hole in a dam saved his country from inundation. We delight in the personal histories of great men and women who were started on their careers by the kindly, encouraging words of some friend.

We know, too, by personal observation that the mighty oak is born of the humble acorn; that it was in a single kernel of wheat the hundreds of millions of bushels of Marquis wheat annually harvested in Western Canada had their origin.

If we would but remember and give heed to the fact that, just as a pebble thrown into the water causes ever widening circles of little waves to sweep its surface until finally they lose themselves upon the shore, so does every word and act of ours create little circles of influence radiating out into our homes, our offices, our communities and the world at large, and, for good or ill, affecting the lives and future of others and of our country, then, perchance, we would be more careful, more considerate, a little less hasty and impatient of others, and more inclined to extend that degree of sympathy and tolerance to others which we naturally expect will be displayed towards us.

Local Option In India

Voters In Town Of Taran Went "Dry" To A Man

An astonishing thing has happened in the Punjab. Citizens of the town of Taran have lately secured from the Provincial Government the privilege of holding a local option election as to whether liquor shops in the town should continue to operate. Over fifteen hundred voters went to the polls and voted "dry" to a man. This is probably the most decisive local option vote yet recorded in any country. The nearest approach to it possibly occurred in Kentucky some twenty years ago when about the same number of votes were cast, and all were "dry" except those of the two liquor

"A GREAT TONIC," SAYS MRS. RUSSELL

After Taking Lydia E. Pinkham's Vegetable Compound

Fenwick, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound during the change of life for nervous feelings, loss of appetite and to gain strength. It is a great tonic and I have taken a dozen bottles of it. It was recommended to me by a friend and I recommend it to all women for such troubles as come at this time."

—Mrs. W. V. RUSSELL, R. R. No. 6, Fenwick, Ontario.

The World's Air Centre

British Ports Will Be Headquarters In Next Decade Is Prediction

Only a decade or two hence and airplanes and airships may be leaving British ports for all quarters of the Empire and of the world as regularly as steamers do now. From coach to railway, from sailing ship to the steam and oil-driven levitator of today, from the horse to the car, from the balloon to the airplane the great job of capitalizing time and space goes on. And at each new step, in each successive phase, British inventiveness, British engineering, and British skill are to the fore. In the air as on the water, Nature has marked us down as the centre of the world. London Daily Express.

WOMEN WHO SUFFER

Anaemia Responsible For Most Of The Ills Of Girls and Women

Medical science shows that most of the ill that afflicts growing girls and women are due to the fact that the blood is either poor in quality or deficient in quantity. This anaemia is the cause of low spirits, languidness, the poor appetite, breathlessness, and the aching back that make life a burden for so many women. There is no need for any woman to suffer in this way, for all the miseries of anaemia can be quickly banished by taking Dr. Williams' Pink Pills. It is an established fact that these pills create an abundance of the rich blood that wonderful reputation is based on that.

Thousands of formerly weak and ailing women have cheerfully testified to the fact that they owe their restoration to good health to Dr. Williams' Pink Pills. One of these is Mrs. Napoleon Gallant, of Fitchburg, N. H., who says: "I am among those who can strongly recommend Dr. Williams' Pink Pills. Before I began using them I was in an extremely nervous condition. I could not sleep, neither could I eat, and was constantly growing weaker. I got medicine from a doctor, but it did not seem to meet my condition, and then, on the recommendation of a friend, I began to take Dr. Williams' Pink Pills. By the time I had taken a couple of boxes there was no doubt that they were helping me. I continued their use until I had taken six or seven boxes when I was again in the best of health. I always keep Dr. Williams' Pink Pills in the house and if any member of the family feels run-down the pills soon put them in good condition."

The best time to begin taking Dr. Williams' Pink Pills is the morning. You feel the least bit out of sorts. The sooner you do so the sooner you will regain your old-time energy. You can get these pills through any medicine dealer or by mail, postpaid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Agricultural Wealth Of Canada

Figures Show the Importance Of Our Basic Industry

The gross agricultural wealth of Canada for the year 1928 is estimated at approximately \$5,027,301,000, an increase of \$19,353,000 over the 1927 estimate.

The total agricultural revenue of Canada last year is placed at \$1,730,304,000 with the following allotment for the nine provinces: Ontario, \$500,821,000; Saskatchewan, \$392,603,000; Quebec, \$277,050,000; Alberta, \$294,028,000; Manitoba, \$148,567,000; British Columbia, \$39,715,000; Nova Scotia, \$10,162,000; New Brunswick, \$34,307,000 and Prince Edward Island, \$21,750,000.

Encouraging Business Outlook

Volume Of Business At A High Limit For First Three Months Of Year

Business activity generally in Canada during the first three months of this year was greater than any similar period since the war, according to an official review of the current business situation in the Dominion.

The dollar volume of business, as indicated by bank debits at the clearing house centres, was at a higher level during the first quarter of 1929 than at any similar preceding period since the record was first compiled in 1924. The total in the first three months of the present year was 15 per cent. greater than in 1928, and 53 per cent. in excess of the aggregate in the same period of 1927, the total in the first three months of 1929 being \$11,508,000,000.

I noticed your wife sitting by the window sewing this morning. I thought you told me she was ill!" "So she was; but today she's on the mend!"

Asked what he understood by "foreign entanglements," a school-boy replied, "Spaghetti."

Scientists predict a toothless race. The borer is apparently not the only pest threatening the corn crop.

Minard's Liniment for cuts and bruises.

Age No Bar To Flying

Lindbergh Says Property Trained Pilot Is Always Efficient

Lindbergh will be flying as long as he can drive an automobile, he told a group of reporters recently in answer to the query as to whether he expected to taper off his flying as he grows older. In the opinion of America's foremost pilot, an aviator skilled in youth can fly as long as he can drive a car. Tersely he disposed of the oft-repeated conjecture that he might give up the air as greater responsibilities caused many persons to think that he would be safer on the ground.

"I see no reason why I shouldn't fly," said Colonel Lindbergh. "If a pilot has been properly trained, he is just as good when he is old as when he was young. Some of the best pilots in service today are getting along in years."

Canada Week In Glasgow

Prizes Given For Best Display In Grocery Stores

A "Canada Week" was held recently in the city of Glasgow, Scotland, under the patronage of Hon. Lord Provost Sir David Mason. Canadian products were featured throughout the week and attracted great interest among the population. This was the first shopping week to be organized by the Dominion in Glasgow. Cash prizes by the value of \$1,000 were awarded for the best displays of Canadian products in grocery stores. In England, also, Canada Week was observed at John Barrie's great London store, where many show windows and a large floor space were devoted to the displaying of Canadian foodstuffs.

A QUICK WAY TO END BABY'S UPSET SPELLS

"Like other young mothers, I worried every time baby cried," says a Syracuse, N.Y., woman. "Several times when she was upset or constipated, I tried castor oil but she couldn't retain it. Our doctor told me to try Fletcher's Castoria because it is harmless and babies like it. That ended my worries and I've used it since for all my children." Castoria never fails to delight mothers by the quick way it ends those upsets of babies and children, such as colic, constipation, colds, etc. That's the reason for its tremendous sale and popularity. Like all good things, it's limited, but genuine Castoria—the pure-vegetable product—always bears the Fletcher signature.

Livestock Producers

Eight Provincial Organizations Join Hands To Form One Body

Canadian livestock interests were linked up in a single organization in Winnipeg the other day, when representatives of eight provincial livestock co-operative bodies formed the Canadian Co-operative Livestock Producers, with headquarters in Toronto. W. D. McKay, of Moose Jaw, president of the Saskatchewan Livestock Producers, was elected president; H. B. Climes, of Toronto, manager of the United Farmers of Ontario, vice-president and treasurer, and J. K. King, of Moncton, N.B., manager of the Maritime Livestock Marketing Board, travelling secretary.

Satisfied Money Was Safe

A man deposited \$10,000 in a bank. A few weeks later he approached the teller and demanded his money. He was asked if he did not want to leave a small balance. "No," he persisted. "I want my money." So the teller counted out \$10,000. By this time a line of people had collected, each one waiting his turn. The man counted the bills very carefully and handed them to the teller.

"Here," he said, "put it back. I only wanted to see if it was all there."

The typewriter is credited to C. L. Sholes, printer editor.

Minard's Liniment—good for tired feet

Final Production Of Radium

Particles Expelled In Final Analysis Appear To Be Lead

Radium is practically the most expensive product in the world and is valued at approximately \$2,000,000 an ounce. Now hospital authorities are anxious because their stocks of radium are slowly transmuting themselves into one of the commonest and cheapest of metals. At varying rates, which cannot be controlled by any known scientific methods, it expels five particles from its atomic nuclei, and these five particles are atoms of helium. Radium is a very heavy element, its atomic weight being 226; helium is one of the lightest of elements, with an atomic weight of 4. Thus the original radium after expelling five helium atoms has an atomic weight of 226-4 x 5, or 206. And 206 is practically the atomic weight of common lead. It seems certain, therefore, that the final product of this rare and costly element is simply lead.

Takes Millions Of Years

It has recently been computed that the largest telescope are so far away that it takes light, travelling at 186,000 miles per second, 140 million years to span the distance between them and us.

Asthma Doesn't Wear Off Alone. Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of stronger and yet stronger attacks. Dr. J. D. Kellogg's Asthma Remedy, taken early, will prevent incipient condition from becoming chronic and saves hours of awful suffering.

For five cents a tourist can ride for hours around the city of Berlin. A system of transfer makes it possible to change at will from street car, auto bus or subway without paying extra fare.

There is no poisonous ingredient in Holloway's Corn Remover, and it can be used without danger or injury.

Farm Is Best

With grade cows selling for more than \$100 at auction sales, with all farm products selling at high prices, this is not the time for young men to be leaving the farm and going to the cities to work for a bare, and often a miserable living.

A town is made beautiful by each one doing his share in fixing up his own property. It's a case of "You in your small corner and I in mine."

All These Advantages For Farm Construction

Greater Structural Strength

Full 3/8" Thickness

New Improved Edge

Takes Any Decoration

Fire-Proof

For both old and new construction Gyproc gives more advantages than any other material. Makes durable, permanent walls and ceilings in less time and at less cost. Cannot warp, crack, shrink or burn, and is ideal for lining houses, garages, poultry houses, barns, grain bins and all other farm buildings.

British Admiralty Has Brought To Perfection An Electrically Controlled Torpedo

After several years of experimenting with a new type of electrically controlled torpedo, the British Admiralty has brought to perfection a projectile which follows the target and carries sufficient explosives to blow the vessel in two when it scores a direct hit, according to reports heard today.

In a test on the admiralty range in Portsmouth harbor, one of the torpedoes got out of control and tore around the harbor at 40 knots. Fast admiralty vessels chased it but they could not overtake it and finally the torpedo landed at Weymouth beach.

Spectators were not allowed to approach within 100 yards of the mysterious projectile and photographs taken by several persons were confiscated for fear the secret of the torpedo's mechanism might be revealed.

The torpedo is not fired like an ordinary torpedo but is launched into the water. Thus the vessel that is carrying it is able to hide in a cove and destroy the enemy fleet with these electrically guided torpedoes without revealing the torpedo carrier's position by an explosion. Once launched, the torpedo is steered by a small wireless apparatus looking like two-tube amplifiers.

The first current applied starts the powerful driving mechanism at the back of the projectile. As it travels forward, a fine copper wire unwinds behind it apparently acting as a sort of aerial. A second wave current controls the steering apparatus which gives remarkable control, enabling the torpedo to follow all the twists and turns of the target. A final current that of an aeroplane, gives the operator the choice of launching the torpedo over the surface of the water at a tremendous speed or of submerging it several feet in order to make a hit below the water line.

The tests produced amazing results. Several old vessels were towed out to sea and a torpedo launched many miles away from them. In every case, and there were 14 tests of this kind, a direct hit was scored by the operator who was able to guide the torpedo to within a foot of the spot aimed at only. Hence the projectile made ever widening circles until it was grounded.

The explosion of the torpedo head is caused by the contact of four detonators, two on the head and two on each side. The explosion occurs immediately when any one of these come in contact with hard projects.

The Explanation

On this trip the crack express had been far from living up to its reputation. First it would go forward fifty yards or so, then back, then stand still, puffing uncertainly, and then begin the same thing all over again. At last one of the travellers lost his patience and summoned the porter.

"What's the matter with this train?" he exploded. "Backing up and jerking forward in this awful way."

"It's quite all right, sir," the porter assured him in that soothing way that porters have. "I think the engineer is teaching his wife to drive."

"Do you see that man through the window? He hasn't moved for twenty-four hours. He can't be asleep; he must be dead. I am going to call the police."

"Oh, it's all right. There's a chess tournament going on in there."

"I have killed five flies, two wasps and three gnomes."

"How do you know that?"

"Two were on the table and three on the looking-glass." It Travers, Rome.

"I have killed five flies, two wasps and three gnomes."

"How do you know that?"

"Two were on the table and three on the looking-glass." It Travers, Rome.

Make Milling Test

Garnet Wheat Found To Be Inferior To Marquis For High Grade Flour

In color, volume of loaf and gluten-content, Garnet wheat is inferior to Marquis, though the two varieties show no appreciable differences in absorption and bread yield, according to the result of a test, completed at the Keewatin Mill of the Lake of the Woods Milling Company.

"If a high quality of flour is to be a first consideration," states the report of the company's investigators, "we cannot recommend Garnet for our mills. The result of this test further confirms our previous convictions."

To stage the experiment, which gave results in accord with previous tests, a mix of 2,000 bushels of Garnet wheat was milled in comparison with Marquis or a commercial basis. "An excellent sample of Garnet was used in the test, weighing 65½ pounds per bushel and averaging 12.5 per cent. protein; the Marquis sample weighed 62½ pounds per bushel and averaged 13.2 per cent. protein."

Regarding Garnet wheat, the company's test states, that the variety is consistently from one to two per cent. higher in protein than Marquis and equal to Marquis in all the best looking points. Hope was expressed in the report that agronomic success in producing Garnet might in the near future enable it to replace all other varieties.

ONE-PIECE WRAP AROUND

It's one-piece! The smart printed silk crepe wrap around model with effective shirring and drape at right side, so suitable for street and all occasions wear. Its extremely slender line makes it so suitable for average full figure. The shirring is repeated at shoulders. Long sleeves have turn-down flared cuffs. A narrow belt crosses back and extends to each side of front. Style No. 469 can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. In the 36-inch size, 2½ yards of 40-inch material is sufficient. Plain silk crepe, canton-fabric crepe, crepe Roma, wool crepe, printed cotton foulard and printed rajah silk are fashionable fabrics suitable. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

Fighting Dealers In Narcotics

Addicts In Egypt Spend \$25,000,000 Annually On Drugs

The extent to which the drug traffic is ravaging Egypt may be gathered from a statement by Colonel Russell Pasha, English head of the narcotics bureau recently established.

He declares that the number of Egyptians who habitually take drugs is estimated at more than 500,000 in a population of 15,000,000 including Europeans and considers that \$25,000,000 is spent annually on the purchase of narcotics.

The bureau is engaged in a stern fight against the dealers in narcotics. One member of the gang recently tracked down in Vienna is reported to have netted \$80,000 during the last two years from the drug traffic.

Three Years Making Table

Ohio Man Used 1,557 Pieces Of Wood But No Nails

Three years of tireless effort have made Burton W. Blair, Marion, Ohio, the possessor of a library table that is considered a work of art.

Without the use of a single nail or screw, Burton has constructed a table that many antique collectors would like to own.

The top is constructed of 1,557 pieces of wood, 17 different kinds being used to give the desired color effect.

Attractive in its simplicity, the unique table contains but three designs, the Masonic square and compass, composed of 62 pieces of wood, and the American legion emblem.

Blair is a World War veteran. He began work on his table October 5, 1925.

Girl Best Cattle Raiser

Twelve-Year-Old Annie Turner Is Champion Of British Columbia

This year's champion cattle raiser in British Columbia is little Annie Turner, twelve-year-old daughter of James Turner, Cadboro Bay stock raiser. Her 12-month-old Short-horn steer, sired by Bradhill Marquis and weighing around 1,100 pounds, won the grand championship of all breeds at the Kamloops bull sale and fat stock show.

But winning trophies for live stock is no novelty for Annie Turner. She won high honors last year and this year she repeated her triumph with cups and other trophies galore.

Must Be Perfect

The optical glass used in an astronomical telescope must be free from imperfections and internal strain. In the polishing operation only a few ten-thousandth parts of an inch of glass are removed. Errors of a millionth of an inch in the surface curve must be detected and remedied.

Prince Albert National Park

Prince Albert National Park, in northern Saskatchewan, has an elevation of 1,800 feet above sea level and contains many lakes and streams which form the beginnings of canoe routes leading both to Hudson Bay and to the Arctic Ocean.

Canada has no leisure class. Those who have no business to attend to are busy at bonspiels in the winter and at golf in the summer. Those out of work keep busy watching the sky-scrapers arise.

British Youths Study Agriculture

An interesting group of British Public and Secondary School Students who have just arrived at Macdonald Agricultural College. These young men will pursue a two years' course of study at the college and during the summer months will work on farms where places have been provided for them. Recruited by the Department of Colonization and Development of the Canadian Pacific Railway the scheme under which these students have come to Canada now enters its fifth year of operation. On completion of their studies these new arrivals will engage in various branches of Canadian agriculture by which time they will have become accustomed to Canadian methods.

Strong For Daylight Saving

Twenty-Five Million In States Will Live Under It This Summer

The Merchants' Association of New York announced recently it had completed a survey showing that 25,000,000 persons in the United States will live under daylight saving time this summer.

While a few of the smaller cities and towns have discarded the "practice" since last survey was made two years ago, the association said the latest inquiry shows the movement on the whole is growing.

A bill authorizing daylight saving is now pending in California; Massachusetts has a statewide daylight saving law; the whole state of Rhode Island will be on daylight saving by virtue of numerous local ordinances, and virtually the entire state of New Jersey will observe the new time.

In New York State 186 cities and villages set clocks ahead, and 33 communities in Connecticut will again adopt the plan. Chicago and eight other cities in Illinois and six cities in Indiana are among other places to adopt the scheme.

Canadian Ice Cream For South Americans

Shipment Goes Forward To Georgetown, British Guiana, By C.N. Steamship

The first shipment of ice cream, which it is believed was ever made to South America from any place in Canada, went forward recently from Turin, B.N. consigned to Georgetown, British Guiana, by the R.N.S. "Lady Drake" of the Canadian National Steamships. The order, which is of substantial size, was received by the manufacturer entirely unsolicited, and the manager of the firm foresees great possibilities in this trade with the inauguration of the new service by the Canadian National Steamships.

Two years ago they made their first shipment of this delicacy outside of Canada to Newfoundland, and this has since developed into a regular trade. Convinced by their success in Newfoundland, the firm decided to extend the export field with the results as noted.

Decline Of Chivalry

Knighthood Appears To Be No Longer In Favor

It was bound to come. Woman having every field of male activity insulating that complete equality between the sexes should be demonstrated beyond dispute, now looms the absence of qualities of which she has deprived the sterner sex in the process of competing with men. A correspondent who writes to the *Six* lamenting the lack of chivalry in men today suggests that women should create a demand for those graces in their own friends which former generations classified as "knight-errantry." But knighthood here at any rate is no longer in flower, and if chivalry is inseparable from titles, then there is small hope that the lady's wish will be gratified.—*Montreal Star*.

Area Under Irrigation In Alberta

In southern Alberta there are now ten large irrigation projects in operation comprising an area of slightly more than one million acres susceptible of irrigation from the 5,500 miles of canals and ditches already constructed.

Canada Makes Great Strides In Past Few Years In Work Of Aerial Mapping

Care At Shearing

Time Well Repaid

Clean Floor and Neat Rolling Of Fleeces Are Essential

With wool providing a very important proportion of the total revenue from sheep and with this product sold on a graded basis as it is in Canada, it is important to exercise care at shearing time, clean out officials of the Canadian Co-operative Wool Growers.

Clean wool, free from chaff, burrs, dung, locks, binder twine, and other foreign material and also from the short black or gray hairs found growing on the heads and legs, is worth decidedly more than wool not so carefully cared for. With the weather warming up those sheepmen who are anxious to get a good coat of new wool on their animals before the fall fairs open are shearing now, although this work will not become general in the East for six weeks yet and in the West before the first of June.

Now-a-days sheep are seldom washed prior to shearing. Washing did not get rid of all the grease and foreign material and the wool had to be scoured when it reached the mills anyway, so today the work of washing or scouring is generally left to the mills, and the general practice is to sell the wool in the greasy state.

There were many disadvantages to washing on the farm anyway, one in particular being to get the wool into nice shape for shearing. Furthermore there is nothing to be gained financially in selling washed wool as against unwashed.

Shearing should be done in dry weather on a reasonably warm day, and by all means on a clean floor or piece of canvas. Before taking off the regular fleeces all heavy and badly stained tag locks should be trimmed off. After shearing the fleeces should be spread on the floor flesh side down, the sides folded in and rolled firmly to get rid of dirt and that the best parts of the fleeces, which are over the shoulder and heart girth, show on the outside of the package.

Wool officials are opposed to tying with binder twine, pointing out that this like the turfs which are tied with the fleeces, will not take the dye when the wool is being processed, and therefore make it unfit for many uses. They advise using paper twine, as supplied by the Wool Growers to all their shippers, or if this is not available the use of the neckpiece, which is twisted into a rope and passed once around the fleece which is then tucked in. Standard wool sacks which hold from 15 to 25 fleeces are advocated for packing the wool in after it is shorn, or if not available, really clean burlap sacks. Tight packing in these sacks is very essential, as it means less shrinkage in weight. Store the wool in a dry place until sold.

Canada Must Improve Barley

Professor Harrison Finds Markets In Europe Only Take Best Quality

Prof. T. J. Harrison, Manitoba Agricultural College, and Paul Brett returned recently from Europe, where they have been making investigations on the barley requirements of the British and foreign trade. Professor Harrison is preparing a report on his trip, but in the meantime is prepared to say that Canada grows the world's worst barley. With plenty of room for improvement, Professor Harrison is making his plans for encouraging better quality. There is a market there for Canada's O.A.C.-21 in the distilling and malt trade, but not for brewing. With such quantities of excellent barley the European markets have plenty of opportunity to skim the tops, and it is only the best they want.

Loggers' Great Egg Eaters

Not Unusual For One To Eat Half Dozen For Breakfast

Poultry producers in British Columbia have been giving more attention than usual of late to the local market afforded by logging camps. Logging camps afford a profitable special market for a number of individual poultrymen. Loggers, as a whole, are great egg consumers. A poultryman has just compiled a list of logger consumers, which is surprising, totaling 3,200 men. Loggers are served with eggs without stint for breakfast. It is not unusual for one logger to eat half a dozen eggs as a starter for the day.

Some ant-hills have their own fire brigades. A woman naturalist in France discovered this by placing a lighted taper on a hill. A battalion of ant firemen promptly appeared and extinguished it by squirting liquid formic acid from their jaws on the taper, while others tore at it. Many of the ants were killed, and one hero dragged another from danger.

Ants Have Fire Brigade

Some ant-hills have their own fire brigades. A woman naturalist in France discovered this by placing a lighted taper on a hill. A battalion of ant firemen promptly appeared and extinguished it by squirting liquid formic acid from their jaws on the taper, while others tore at it. Many of the ants were killed, and one hero dragged another from danger.

Mrs. Dull: "The cake recipe Mrs. Smith gave me is too expensive to use. The eggs cost too much."

Maid: "How many does it call for?"

Mrs. Dull: "Eighteen; the yolks of nine and the whites of nine."

Father: "It's late; hasn't your young man closed the door yet?"

Daughter: "Yes Daddy."

Father: "From the outside?"

Cadnium Produced In Canada

Cadnium was produced in Canada for the first time in 1928. It is used for plating purposes, in colour making, medicine, and dyeing.

"These maps are not taken for any mere scenic record, although they would be well worth while for that alone," said Mr. Stewart. "The maps are used for tracing, mineral deposits, oil and timber resources, locating transportation routes, range land and water courses. The airplane is giving Canada the best opportunity she has ever had of studying herself and finding out just how wealthy her resources really are."

Aerial mapping is a comparatively recent development in Canada, although in the last two or three years amazingly long strides have been made. In 1921, for instance, only 250 miles were mapped, while last year the area mapped from the air totaled 55,000 square miles. Last year the Royal Canadian Air Force made 4,600 photographs from the air under direction from the topographical survey department.

There are two methods of air mapping—the oblique and the vertical. The former method covers territory much quicker than the latter, and is practicable in flat country but in British Columbia it will be necessary to use the vertical method.

While the accurate production of maps from aerial photography calls for a good deal of ground control in co-operation with aerial work, the aerial pictures are an excellent means of making quick maps of new territory, a frequent demand in these days of rapid mineral and timber development, according to Mr. Stewart. He states that new aerial maps of Northern Ontario and Manitoba show how detail may be obtained in this way that would take years of ground work. On some of the Ontario sheets thousands of lakes have been mapped that never appeared on the records before the air pictures were made.

In the next few years Canadian officials expect to have a million pictures of Canadian territory, according to Mr. Stewart. One-quarter of that number have already been obtained.

The Wastebasket

"Who taught you to use those dreadful...?" asked an old lady on the street of a youngster she heard tearing off some lively remarks, "Santa Claus," he replied, "Santa Claus!" she exclaimed, "Yes, when he fell over a chair in my room last Christmas eve," the youngster replied.

Heard at the social gathering: Hostess: "I've asked Miss... several times to sing for us and she has refused each time." Host: "Well, let it go at that. Some of the strangers here may go away thinking they have missed something."

A local man brought home a proof of a photograph of himself the other day and handed it to his wife. "But, dear, in this photograph you haven't a single button on your coat," she said. "So you've noticed it at last!" he replied, "That's why I had the photograph taken."

The barber college yell:
Cut his lip,
Rip his jaw,
Leave his face,
Raw! Raw! Raw!

"What makes B... so pleased with his wife?" asked one fellow of another at lodge here the other night. "Well, you see he has just turned from his old home where he got a glimpse of the girl he been dreaming about for the past twenty years," was the reply.

"And, sweetheart, I lay my fortune at your feet," said a Holden fellow when proposing to a Bruce girl last week. "I'm afraid it isn't a very big fortune," she hinted. "I know, dear," he replied, "but it'll look awfully big beside your little feet." He got the job.

Heard at the ladies social: "I saw Mrs. ... yesterday and we had the loveliest confidential chat together. "I thought so; she wouldn't speak to me today."

Heard at the poker party: "I wouldn't stand for it old man. Your wife goes around telling that she made a man out of you." "Well, that's no worse than what your wife tells. She says she has done all that was possible with you."

Evy Jones was working around a telephone pole along the road near town last week when a lady driving a car and accompanied by her husband came along. Just as the car came along Evy started to look up the pole and he overheard the lady say to her husband: "Just look at that man, he must think I don't know how to drive a car."

Heard at the dance: "The clothes of that flapper remind me of a Christmas turkey." How so? "More white meat than dressing."

OF COURSE NOT

Speaking of the man who doesn't need to advertise because "everybody knows where he is and what he sells," a fellow-editor has the following fat comment:

"Of course—
"if you are the only person selling the commodity you handle—
"and everybody knows it—
"and everybody wants it—
"and there is no substitute—
"and there is no likelihood of a substitute—
"and no likelihood of a competitor developing—
"then—
"you don't require any advertising or any selling pressure—
"and you will be a millionaire in a few months—
"and then you will probably—
"fall out of bed and wake up."

"Do not make fun of the coffee," said a travelling man to a friend while eating in a Bruce restaurant, "You may be old and weak yourself some day."

A young man here who was recently married was taken down with a spell of the flu some time ago, and his wife anxiously called up the doctor over the telephone. "Did you take his temperature?" asked the doctor. "Yes," she replied, "and it's 138." "You don't want a doctor," replied the physician, "you better call the fire department."

Conversation overheard between two high school students here: "I tell you that the co-existence of Mnemonic survival with sensorial excitations, is the only conceivable definition of temporal apprehension."

"And I tell you that the invocation of mnemonics is extra-datal. And that sensorial continuity is the datum. The juxtaposition of Mnemonic survival with sensorial impression discloses no warrant for sequential and co-existential discrimination."

**CANADIAN NATIONAL
ANNOUNCES CHANGES
IN TIME SCHEDULES**

"The Confederation," running on the Canadian National Railways between Toronto and Vancouver, by way of Winnipeg, Brandon, Regina, Saskatoon, Edmonton, and Jasper will go into operation again on May 19th replacing "The National", which runs between Toronto and Winnipeg. The first westbound "Confederation" will depart from Toronto on Sunday, May 19th, and another set of equipment will leave Winnipeg on the same day. The westbound train will reach Edmonton daily at 10 a.m., leaving 20 minutes later, arriving at Jasper at 6:20 p.m., Mountain Time, and leaving at 5:40 Pacific Time. Eastbound, the train will reach Jasper at 6:40 a.m. Pacific Time, and leave at 8:05 a.m. Mountain Time; arriving at Edmonton at 3:20 p.m., and leaving at 3:40. Other time table changes announced by the National system include:

Calgary-Edmonton—Train 13, will leave Calgary at 8 a.m. instead of 7:50 effective May 20th. It will connect at Camrose with Train 25 from Big Valley, Stettler and other points, and at Tofteld with the Confederation for points east. Effective May 20th, Train 25 will leave Calgary at 7 a.m. instead of 7:30, also connecting at Camrose and at Tofteld.

PROGRESSIVE, representative motor-
ists are being attracted by the thousand
to the Pontiac Big Six.

Because it has a Big, six-cylinder engine,
with GMR high-compression cylinder head.
Because its line-of-drive is accurately bal-
anced. Because it has big, beautiful Bodies
by Fisher. Because it has the comfort of
Lovejoy Shock Absorbers, spring covers
the security of big, noiseless internal-
expanding four-wheel brakes and an array
of big-car features never before combined
at anywhere near its price.

You should see Pontiac Big Six before you
decide on any car.

**KEEN INTEREST SHOWN
IN TURKEY RAISING**

Greatly increased interest in turkey
raising as a profitable sideline to gen-
eral farming operations is reported
throughout the province. Still fur-
ther expansion is anticipated judging
from the number of inquiries received
by the poultry branch of the Depart-
ment of Agriculture for the recent
publication "Turkey Breeding and
Management" which is a free bulletin
available for distribution.

**WAR DECLARED ON GOPHERS,
CROWS AND MAGPIES**

Cash prizes ranging from \$1.00 to
\$200 will be paid by the Department
of Agriculture in various competi-
tions in the campaign for the destruc-
tion of gophers, crows and magpies
during the present season. Details of
the various competitions will be made
as their object the protection of farm
crops and insectivorous and game
birds can be secured from the office of
Benjamin Lawton, Game Commis-
sioner of the Department of Agricul-
ture.

**OLD AGE PENSIONS ACT
IN OPERATION SOON**

The Old Age Pensions Act will prob-
ably come into operation in Alberta
in about a month or so accord-
ing to a statement made on Thursday
by Premier Brownlee. The Act, it has
been decided by the Executive Coun-
cil, will be placed under the jurisdic-
tion of the Workmen's Compensation
Board, and arrangements are being
made for this board to administer the
provisions of the new Act. Under the
proposed plan it is necessary for each
province sharing in the benefits of
the Dominion legislation to submit
its supplementary and contributory
legislation to the Dominion Govern-
ment through Hon. Peter Heenan,
Minister of Labor, for final ratifica-
tion and to draw up a formal agree-
ment of operation. As soon as this
step has been taken it is expected the
Alberta Act will come into effect. The
payment of pensions will not become
retroactive but will date from the time
the Act is proclaimed.

VILLAGE OF IRMA, IRMA, ALTA.

BY-LAW NO. 18.

**RESTRAINING ANIMALS
RUNNING AT LARGE**

The Council of the Village of Irma
Alberta, enacts as follows:

(1) A. In this by-law unless the
context otherwise requires, Animal
means any head of cattle, horse
sheep, goat, swine or poultry.

B. Cattle—Means any Bull, Cow,
Ox, Heifer, Steer or Calf.

C. Horse—Means any horse, mare,
gelding, colt, filly, ass or mule.

D. Sheep—Means any ram, ewe,
wether or lamb.

E. At Large without being under
the control of the owner or possessor
either by being securely tethered or in
direct and continuous charge of a
herder or by confinement within any
building, fence or other enclosure.

(2) It shall not be lawful to allow
any animal to run at large at any
time of the year within the limits of
the Village of Irma.

(3) Any animal found at large or
trespassing upon any lands or prem-
ises enclosed by a lawful fence, con-
trary to the provisions of this by-law
shall be liable to be impounded and
sold according to the provisions of this
By-law unless the damages, expenses
and fees be sooner paid.

(4) Nothing in this By-law shall
prevent any person from waiving his
rights under this By-law and taking
action to recover compensation in any
court of competent jurisdiction from
any person owning or having the cus-
tody of any animal through which
damage has been caused contrary to
the provisions of this By-law.

(5) There shall be established in
the Village of Irma a public pound
and a pound keeper appointed for
said pound, his remuneration to be
such fees and charges as he shall be
entitled to under the provisions of
the Domestic Animals Act, 1923.

(6) The said pound shall be for the
impounding of animals at large or
trespassing contrary to the provisions
of this or any other By-law of the
Village of Irma, which said impound-
ing may be done by any other per-
son than the Poundkeeper.

(7) Whenever any animal is im-
pounded it shall be the duty of the
poundkeeper to retain same until the
owner or owners thereof shall have
paid the fees and damages if any
claimed for the trespass.

(8) When any animal has been
confined or detained by any person
under the provisions of this By-law
for the purpose of impounding the
same if the owner of the animal or
some person in his behalf pay or ten-
der to the person seizing or having
charge of such animal before same
has been actually impounded the
charge for which the said animal has
then become liable under this By-law,
the person having charge of such ani-
mal shall forthwith deliver up the
same to the owner or the person
tendering the said charges on his be-
half.

(9) Nothing contained in this By-
law shall deprive the owner of any
impounded animal of any action, re-
medy or right that he may have at com-
mon law or otherwise by reason of the
same being unlawfully seized, dis-
trained or impounded.

(10) Any person who leaves open
any gate or lets down any bars or
makes a gap in any fence for the pur-
pose of permitting any animal to tres-
pass or who otherwise causes any other
animal to trespass shall be guilty
of an infraction of this By-law.

(11) Any person claiming any
damage for trespass by any animal
impounded may at any time before
the animal is released deliver to the
poundkeeper a statement in writing
showing the amount of his demand.

(12) Any person or persons found
guilty of a breach of this By-law shall
upon summary conviction forfeit and
pay a penalty not exceeding \$100 and
costs for every offence and on default
of payment thereof it shall be lawful
for the Justice so convicting to sen-
tence the offender or offenders to im-
prisonment in the nearest common
goal with or without hard labor for a
period not exceeding 30 days unless
the said penalty and costs including
the costs of the commitment be paid
sooner.

WORLD HAPPENINGS BRIEFLY TOLD

Lord Revelstoke, who died recently in Paris, where he was attending the meeting of the reparations conference, left half a million dollars to King Edward's Hospital fund for London.

The estimates tabled in the Newfoundland legislature provide for a total expenditure for 1926-27 of \$10,547,706, as against \$10,128,130 for 1925-26. The total funded debt of the colony is \$81,421,149.

The British ship "Cyclone" has left Irak to protect British subjects in Abadiah, Persia, where mobs had got beyond control of police. Persian troops have been called to restore order.

Profound secrecy surrounds the building programme of the French Air Ministry. Everything around the Ministry building is in a turmoil and aviation factories are working day and night to carry out the programme.

A country-wide search for Miss Barbara Pitcher, missing McGill University student who disappeared in Montreal, March 21, was brought to an end with the finding of the young woman's body in Back River, near a convent at South du Rocher.

To provide an outlet for surplus stocks of potatoes, the New Brunswick Department of Agriculture is encouraging the erection and operation of starch plants in the potato raising sections as a means of taking care of the small and otherwise unmarketable potatoes from the crop of succeeding years.

The Nationalist government state council announced that benevolent decapitation as a method of execution in China would be prohibited. Decapitation had been discarded by previous regimes but it was still used by the police and military authorities for executing bandits and robbers. Its complete abolition has now been ordered.

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Infection, followed often by death may result from poking corns with an infected razor. Quick, safe relief comes from using PUTNAM'S CORN EXTRACTOR. If afflicted with corns, callouses or sore foot-lumps, use "PUTNAM'S"—it's reliable, and sure to shrivel up the corns so they drop right off. No pain, no soreness, but quick relief from corns comes to all who use PUTNAM'S PAINLESS CORN EXTRACTOR. 25c. at all dealers.

Alberta Pool Elevators

The Alberta Wheat Pool made a definite start the other day in extending its country elevator system when it was officially announced that 12 of these elevators had been contracted for and 12 others bought over from different interests.

"Why couldn't they get on to gether?"

"Well, you see, he's a Scot and she would persist in washing out his shaving brush every morning."

British piano manufacturers have captured both the American and New Zealand markets from their American rivals.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The fastest remedy is an alkali which neutralizes acids. But don't use crude lye. Use what your doctor would advise. The best help is Phillips' Milk of Magnesia. For 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

Magnetic North Pole Reached By Canadian

Wireless Message Has Been Received From Major Burwash

A wireless message from under the mythical shadow of the Magnetic North Pole is the latest achievement of Canadian science.

Within a hundred miles of the place where Sir John Franklin and his men disappeared and died, Major L. T. Burwash, Canadian explorer, engineer and scientist, has sent word to the Northwest Territories branch of the ministry of the interior of his safety and whereabouts.

Major Burwash went into the Arctic alone over a year ago to make scientific observations at the Magnetic Pole, and to search for further relics of the Franklin expedition. Where Franklin and his men perished and died of starvation, Burwash lived on and carried out his scientific mission. He has now been ordered by wireless to make an investigation into the long-fabled copper deposits along the Coppermine River.

Search For the Brightest Boy

Thos. Edison To Grant Scholarship To Candidate Passing Test

Thomas A. Edison, grown gray in achievement and fame, has started out to find a boy to whom he may pass on some day the torch of his genius. He started a search for the brightest boy in the United States when he finds him, he is going to send him to college first of all.

A scholarship, taking care of all tuition fees for four years at "Whit-ever" technical school the winner wishes to enter, will be awarded the high school or preparatory school boy who most intelligently answers a questionnaire to be made up by Mr. Edison.

The winner will be one of 19 to be picked, one from each state and one from the District of Columbia.

Mr. Edison will pay the expenses of all 19 boys from their homes to his laboratory at Orange, N.J., about August 1. There he will put to them his questionnaire.

Okanagan Fruit Prospects

Despite hard winter weather there is very little injury to the fruit trees of the Okanagan Valley, and indications are for a fair setting of all fruit with fine prospects for the apple crop at the southern end of the valley.

Hack—A producer says that the movie of the future will be a combination of silence and sound.

Peck—I see. Like a man carrying on an argument with his wife.

Nation-Wide Fame.—There is trouble, dear the of the great "Nation-Wide" the merits of Dr. Thomas' Electric Oil have not been tried and proved. It is one of the world's most efficient remedies for sore throat, lame back and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

People expect too much of a boy who is at the growing age. When he has done his eating and his growing he has put in a pretty full day.

We would say that a stable government is one in which the people remain hitched.

Canadian Legion

Dominion Convention To Be Held In Regina In November Of This Year

The Dominion Convention of the Canadian Legion B.E.S.L. will be held in Regina on November 25th, 1926.

To those ex-service men who are not members of the Legion, the present is an opportune time to become identified with the organization that has done much to promote the welfare of returned men, their widows and dependents.

The work of the Legion is not diminishing as the years go by, but rather is growing. The membership likewise is increasing and particularly so in Saskatchewan since the Provincial Convention, but in the province there are still a number of men who are eligible to join, and who have not as yet identified themselves with the organization, possibly due to lack of opportunity to do so.

With the increase of branches throughout the province, there is now local representation in practically every district, and the provincial average Canadian Legion Regiments will be pleased to advise anyone, on request, of the nearest local branch.

Unity among returned men was accomplished when the Canadian Legion came into being some years ago. All that remains is to complete the membership and make the organization even more representative than it is today.

On its record of achievement, the Legion deserves the support of all ex-service men, and it is hoped that the next few months will see every eligible man in Saskatchewan enrolled. The dues are nominal, but the presence of every returned man in the ranks of the Legion will be of the utmost value in furthering the aims and objects of the organization, and in promoting that comradeship which is one of its biggest assets.

Useful In Camp. Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Electric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pain in the muscles and should a cut, or contusion, or sprain be sustained, nothing could be better as a dressing or lotion.

A dentist is the only person who can tell a woman open and shut her mouth at will and get away with it.

CANADIAN AIR MAIL PLANE ESTABLISHES WORLD'S RECORD

The entire world recognizes that Canada, in proportion to her population, is making greater practical use of aircraft than any other country and the "work" records of Canadian airplanes are regarded as even more important contributions to the advancement of aviation than the endurance and other stunt achievements of other countries.

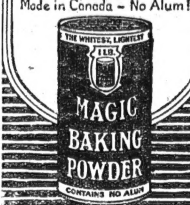

Canada's latest and most impressive practical record in air is in speedy delivery of air mail and Capt. D. S. Bondurant, pilot for Canadian Airways (subsidiary of International Airways of Canada, Limited), as a result of a record flight between Toronto and Montreal, now holds the world's air mail speed record.

Capt. Bondurant, flying a Fairchild "T-1" powered by a Pratt & Whitney Wasp engine, on March 21st, covered the 246 miles from Toronto to Montreal in just one hour and forty-four minutes, and this has now been established as the world's fastest air mail flight.

Remarkable as this time is, Capt. Bondurant would have bettered it, but for fog encountered a little over 100 miles from Montreal. Up to this point he has flown 215 miles in just 80 minutes, maintaining a speed of over 3½ miles a minute.

FOR ALL your baking, use MAGIC BAKING POWDER

Made in Canada - No Alum!

Recipes For This Week

FRUIT OMELET

- 1 egg.
 - Few gratings orange rind.
 - 1 teaspoon orange juice.
 - Few grains salt.
 - 1 orange.
 - 2 teaspoons butter.
 - 2 teaspoons powdered sugar.
- Beat the egg slightly, adding the orange rind and juice and salt. Peel the orange, removing all white membrane, and cut into very thin slices. Sprinkle with one teaspoon of the powdered sugar. Melt the butter in hot individual omelet pan or frying pan. Pour in the egg mixture and cook over a low heat, shaking the pan and pricking the mixture with a fork until all the mixture is cooked. Roll or fold and turn out on to serving dish. Sprinkle with remaining sugar and surround with slices of orange.

A BALANCED MEAT DISH

Shred one pound of lamb, beef or pork and brown in its own fat in a frying pan. Add one cup of chopped celery and celery tops, one tablespoon minced onion and one tablespoon salt. Cover and cook about ten minutes. Add two tablespoons flour and two tablespoons butter mixed together and two cups canned strained tomato juice. Stir until the mixture is thick and bubbling, then serve.

Fixing Blame For Accidents

Most Drivers Usually Maintain They Were In the Right

Human nature at its most unreasonable point, is apt to be manifested after an automobile collision. If one happens to witness such a smash, and gathers in the bunch that collects around the two colliding cars, he will probably hear some loud and irrefragable arguing.

The two drivers, if the collision was serious, are suffering from nervous shock, and will say things they would not say under ordinary conditions. Some people have the manliness to admit they were wrong, but the ordinary thing is for each driver to maintain that he was wholly right and not to blame in any way.

The truth usually is that both parties were somewhat to blame, though one of them may have been principally at fault. These things happen so quickly that it is almost impossible to assess the responsibility with strict accuracy. But if either one of the two drivers had been following a policy of special caution, nothing would probably have happened.

New Silver Process For Purifying Water

German Scientist Discovers Cheap Method Of Killing Germs

Sterilizing water for drinking purposes will be an easy matter if the method discovered by a Munich engineer, Dr. George Krause, proves feasible.

All that is needed to destroy the myriads of germs contained in 10,000,000 quarts of water is one and a half grains of silver prepared by the Krause method.

A professor of hygiene at Greifswald University, Dr. Rudolf Dogwitz, who has made a thorough test of the process, confirms the efficiency of the invention.

Within less than an hour he succeeded in completely sterilizing a cubic centimeter of water which contained a million germs.

The new method is said to have several improvements. It works independently of temperature, it can be applied to any quantity of water and needs no supervising.

Saskatchewan Hemp

Feasibility Of Hemp Growing Has Been Demonstrated

With the object of promoting hemp growing in the district, the Southern Board of Trade has instructed its secretary to purchase and distribute quantities of hemp seed. The feasibility of hemp growing as an industry has been demonstrated by seven farmers in the area who have all had plots of four acres under cultivation. Although the seed was not sown until June last year, a month later, the hemp grew 13 feet in height. The Provincial Government is assisting in building up the industry. The nearest factory is at Portage La Prairie, Manitoba.

Short of Breath Smothering Feelings Choking Sensation

Mrs. H. Day, Dartmouth, N.S., writes: "For over a year I was troubled with smothering spells and shortness of breath, and it was impossible for me to walk even a short distance, because of the choking sensation which followed. After trying many treatments, in vain, I at last decided to try

and in a surprisingly short time they did me much good.

Price 50c per box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Will Hold Ploughing Matches

Some thirty-five points in Saskatchewan have already signified their intention of holding ploughing matches or ploughing demonstrations this year and it is expected there will be still more.

Customer—You say this material is the very latest fashion?
Assistant—The very latest madman.

But will it fade in the sun?
No, it's been in our window for two years.

When intensely angry and searching for a fitting word to express your self, say "Toosevelt," which, we are reliably informed, is the biggest dam known.

A nautical mile is 6,080 feet, or 800 feet more than a land mile.

Bay Route Cannot Operate This Year

Impossible To Have Things In Readiness Early Enough

While the Hudson Bay Railway may be ready for traffic early this autumn, it is altogether unlikely that harbor developments at Churchill or the aids of navigation which must be installed in Hudson Straits will be sufficiently advanced to permit of commercial navigation of the new northern route.

In order to open the route this year it would be necessary to have everything in readiness by October, as the season of navigation cannot be relied upon to extend past December, this is not deemed to be possible, but the route probably will be in full operation in the summer of 1930.

Sheep are old at 12; an ordinary domestic pig has been known to live to the age of 30.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother's Graves' Worm Extirminator.

Little Joe opines that the splinters in the ladder of success won't bother you unless you are sliding down.

CHAPTER XIX—Continued.

Connie had rehearsed this moment a thousand times. She stood quietly on the steps for a moment, then slipped gracefully to the platform. Connie herself could not have imagined how changed she was. From coffee to dainty French heels she was dressed, as if fresh from the hands of an expert Parisian, couturier. So dazzling was she that she positively took Donald's breath away. It seemed to him that she had grown like a magic rose, all at once from a tiny bud to a full blossom. No fault could be found with the perfect oval of her face, or with the delicate white rose skin, from which every trace of tan had gone. The long lashes, that fringed her big blue eyes had turned a shade darker than the curling waves of her abundant golden hair.

Andy, whose small form had been hidden in the rear, moved busily forward, fumbling the wide hat held in his hand. "Elo, Connie," he blurted, as his lips parted in a wide smile of welcome.

Instantly Connie forgot her assumed dignity and became her warm, impulsive little self. With a glad cry she flung her arms about Andy's neck and kissed him.

"Strike me pink!" breathed Andy, as his hand stole up to touch the spot where Connie's lips had brushed his cheek.

Connie turned to face the lake. "Oh, Dad!" she cried in ecstasy, "isn't it good to be back here again?" She stretched her arms toward the ice-choked peaks. A gentle breeze swept down the wooded slope to fan her face as though in welcome. The blood surged beneath her smooth white skin and went singing through every vein. "Ah!" she sighed happily, as she inhaled a deep breath of air laden with the odour of pine from the hills she loved. Donald, gazing at her hungrily, saw tears brimming under her long lashes.

From the far end of the train a tall, grey-haired man assisted a slender, sweet-faced woman to the ground, and then walked toward the station. As they stepped to the platform the woman's eyes rested on Donald, who stood with his back to her. Instantly she became rooted to the spot, eyes wide, one hand fluttering toward her heart. With the supreme, wondrous mother-love shining in her eyes, she held out her arms.

"Donald!" she cried passionately, "Donald!"

Donald whirled at the sound of the loved voice calling his name. His heart throbbed wildly, his throats felt constricted and his face paled under stress of strong emotion.

"Mother!"

His arms were around his mother, yearning, tender, hungry, after these long months of separation. Her face, upturned to his was white and drawn, but her eyes shone with hallowed joy. He felt his hand gripped in his father's strong fingers, and saw his eyes shining with tears. John McLean patted his boy's dark head with a shaking head.

"Donnie! My boy, Donnie!"

For some time Donald was oblivious to all save the great happiness of meeting his parents. His mother's embrace almost unmanned him, and it was with difficulty that he kept back the sobs that tightened his throat.

He led his parents to the other end of the platform and introduced them to his friends.

Robert Rennie's comments were simply gasps and a reiterated, "Well, Well!"

Andy offered his usual contribution, "Strike me pink!" he said.

Connie's eyes were filled with softness as she greeted Donald's mother. The glow in Donald's face as he spoke to Connie was poignant, significant of his deep love for her. But Connie, to his consternation and dismay, met his ardent glances with a look of cold indifference.

Since Connie's arrival Janet's features held a look of disquietude, but she acknowledged the introduction to Donald's parents with a radiant smile.

A moment later, Connie, with skirts held high, was turning down the railroad track.

"Going after her horse," smiled Wainwright in answer to Donald's question.

"Will you have dinner with us?" invited Donald.

"Yes, thank you," responded Wainwright. "We will sleep in the car to-night," he continued, "but Constance insists that we must return to the old home as soon as possible. She has been busy drawing plans for a chalet she intends building on the bluff."

Connie returned with the old trapper, the latter leading Pegusus.

At dinner Connie showed no signs of her former shyness. She was as self-possessed, calm and perfectly poised as a goddess. A glad light shined her eyes as Gillis and his crew of "redshirts" filed into the big dining-room. She sprang to her feet and greeted them joyfully, shaking hands with each and everyone.

"I'm so glad to see you, Jack," she smiled.

The big logger took her tiny hand in his. "We're sure glad to have you with us again, Connie."

"May I bring Andy in to dine with us, Mr. McLean?" she asked as she came back to the table.

Donald nodded assent. She ran fleetingly to the kitchen, and a moment later the loggers grinned broadly as she came through the door leading the protesting cook by the arm.

"Now," she said as Andy sat down, "we're all here." She looked about her and clasped her hands rapturously.

iv. "It seems as though I had been gone for years. And oh, it is so nice to be home again!" She sank to a chair between Andy and the trapper. "Do you remember, Andy, when you were dressed as a baller and danced with John at your party?" She threw back her golden head and her silvery laughter filled the room.

Janet was unhappy from the moment of Connie's arrival. She had caught the look of adoration in Donald's eyes as Connie stepped to the station platform. Standing there then she had quite definitely abandoned any hope of winning him. And Janet had been so sure that once she had held a place in his heart, a great depression, a great weariness of spirit, settled upon her.

That evening, as Donald walked with his parents by the lake-shore, he turned to his father. "Dad," he said anxiously, "do you think I have made good? Will you forgive me for—"

John McLean's eyes grew suddenly misty. "Donnie," he began gently, "Mr. Rennie has told us all about you. And no man could speak more highly of another." He drew a newspaper from his pocket. "Haven't you seen this?"

It was Vancouver's morning paper with a full-page devoted to the visit of the Eastern lumbermen. There were several photographs of the Summit Mill and one of Donald. The paper spoke of him as "the able young engineer whose modern ideas and energy had given to British Columbia a logging plant and mill that were a credit to the Province."

Donald saw the proud light in his father's eyes, and his heart was filled with a great peace.

The next day carpenters and material arrived for the construction of Wainwright's new home. That afternoon Connie, clad in fashionable riding habit, came to the mill office with her foreman to place an order for lumber. Pegusus in silver-mounted bridle and English saddle was proudly restive. With neck arched he curvetted and rocked while Connie sat on his back with that complete lack of self-consciousness that is the heritage of a born horse-woman. Before leaving she rode up the hill among the tolling workers, her irresistible smile bringing an answering grin from the "redshirts," who doffed their hats and shouted a joyous greeting.

All day pack-horses and men struggled up the hill, staggering under the weight of building material. But although Donald strained his eyes for a glimpse of the golden-haired rider, he saw her no more that day.

(To Be Continued.)

Little Helps For This Week

"Ohey My voice, and I will be your God, and ye shall be My people."—Jeremiah vii. 23.

Three roots bear up Dominion; Knowledge, Will; These twin are strong, but stronger yet the third. Obedience; It is the great tap-root that still.

Knitround the rock of Duty, is not stirred, Though heaven-loosed tempests spend their utmost skill.

—James Russell Lowell.

Tenacity of will lies at the root of all courage; but courage can only rise into true manliness when the will is surrendered; and the more absolute the surrender of the will, the more perfect will be the temper of our courage and the strength of our manliness. "Strong Son of God," cries the poet, "Immortal Love, our wills are ours to make them Thine;" and that strong Son of God, to whom this cry has gone up in our day, and in all days, has left us the secret of His strength in the words, "I am come to do the will of my Father and your Father."—Thomas Hughes.

Minard's Liniment relieves pain.

Heating By Radio

French Scientist Says Wireless Waves Can Be Used To Warm Homes

Wireless beams from the Eiffel Tower may be employed to furnish heat for the residents of Paris, if tentative plans drawn by French engineers are put into effect.

Heating plants deriving their power from radio waves are operating successfully in Germany, according to Jacques Risler, whose report forms the basis of these plans. Risler said that while the question of wireless heating houses is still in the experimental stage, the feasibility of it has been definitely established.

Explaining how the wireless heating plant would operate, Risler said: "In the laboratory two posts were set up about 50 feet apart. The sending post sent out from 400 to 500-volt current waves of two to three meters in length. All that is to be done is to interpose on the receiving post circuit a filament in vacuo, and it is raised to an incandescent state and gives out quite appreciable heat."

"There is therefore no theoretical difficulty in installing in a house a series of receiving posts which would in reality be just so many electric radiators. This system could be extended ultimately to an entire district or to a whole city, which would derive its heat from one central broadcasting station."

Rents Home By Wireless

Member Of Byrd's Party Closes Deal In New York

Willard Vander Veer, one of the motion picture operators with Commander Byrd's South Pole expedition, closed a lease for a Westchester apartment by radio from a point somewhere near the southern extremity of the world. The lease covers a suite in the Dorset, Bronxville Knolls, which had been selected by Mrs. Vander Veer.

Several days ago she sent by radio a description of the apartment to the rent asked and other particulars to her husband in the great expanse of ice near the South Pole, never really expecting that it would reach him. She was surprised, therefore, to receive a message at her home, 131 Homestead Avenue, Mount Vernon, from her husband to close the deal.

Nevralgia succumbs to Minard's Liniment.

California is likely to become the first horseless state in the United States, for horses are rarely used there now except in isolated regions.

In the days of our Grandmothers and Great Grandmothers this name **McClary** meant a great deal just as it does today. Buy goods bearing the **McClary** name with complete confidence

NO MEDICINE LIKE BABY'S OWN TABLETS

Once a Mother Has Used Them She Will Use Nothing Else

To once use Baby's Own Tablets is to use them continually—that is as long as there are young children in the home. That is the testimony given us by mothers from all parts of Canada. They testify that they know of nothing to equal the Tablets that they find them safe and efficient and at the same time pleasant to take.

Mrs. John Hollinworth, Maidstone, Ont., writes:—"I have three children, the eldest fourteen and the youngest nine months old. I have always used Baby's Own Tablets for them, and have found no other medicine to equal the Tablets as a relief for the many ailments of childhood."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach. They drive out constipation and indigestion, break up colds and simple fevers and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Foremost Fur Producer

Canada is one of the foremost fur producers of the world. Raw furs are the chief commercial product of the wild life of the northern half of the continent and as such represent the only economic return from large areas in the Dominion.

Great works are performed not by strength, but by perseverance.

Largest Thermometer Seventy Feet Long

Has Been Erected In Museum Tower At Munich

The largest thermometer in the world was recently erected in the tower of the Deutsche Museum at Munich. It is 22 metres—about 70 ft.—long, and shows not merely the temperature of the moment, but the maximum and minimum of the previous day. It is regulated by another instrument of normal size, connected by electrical apparatus. Not until a thermometer becomes more than about 60 ft. long do you realize how exciting it can be. Blow hot, blow cold, the temperature of the breeze changes from minute to minute. The mercury ebbs and flows like a ripple on the seashore, and the spectator finds difficulty in tearing himself away from contemplation of the restlessness of the atmosphere.

Egyptian papyrus 2000 years old are in better condition today than some of the paper which went under the printing presses during the World War.

HEADACHE RELIEVED QUICKLY

CARTER'S Little Blue Pills quickly corrects the digestive disturbances, removes the intestinal poisons, and eases headache quickly disappears. Your whole system enjoys a tonic effect, constipation vanishes, and you feel a renewed vigor. Avoid bromides and dope, they are depressing and harmful. All Druggists 25c and 75c red packs. **CARTER'S LITTLE BLUE PILLS**

The invisible difference

Many motor oils look alike, but there is a vast difference in the way they perform. Unfortunately this difference is difficult to detect.

The invisible difference which makes one motor oil better than another must be inherent in the crude from which it is made.

There you have the reason why Marvelube gives better engine lubrication than oils refined from ordinary crudes. Imperial Oil searched the world over for a better crude—and in South America they found it. From it they make Marvelube—a pure, carbon-free, full-bodied oil that resists the extreme heats and pressures of modern engine operation.

Aircraft operators prefer Marvelube because better lubrication means greater safety and longer intervals between overhauls. Motorists prefer Marvelube because it is the ideal oil for modern motors. It ensures greater power, greater flexibility and greater economy.

There is a grade of Marvelube refined to meet exactly the specifications of your car. Consult the Marvelube Chart at Imperial Oil service stations and dealers.

Marvelube

Simple Precautions Against FLU

Sore Throat —

— The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease-breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

Men's Wear

Men's Arrow Shirts

See the New "Airtone" Arrow Shirt. Fresh as the Morning Air Mail. Exclusive "Airtone" Fabrics. Delicate Airline Stripe or Fine Checks. Smartly tailored with French Cuffs. Two collars to match or Soft Collar attached.
